

Cooling tower fill type 30,0

- counter flow cross-fluted cooling tower fill
- minimizing the risk of clogging the fill
- recommended for application with poor water quality
- steady water distribution with maximum cooling performance

Type 30,0

Material of film	PVC
Fill size (standard)	2400(1200) x 500 x 30 mm
Thickness of film	0,35 mm, others on request
Height of wave	30 mm
Hydraulic loading (spray intensity)	6 – 20 t/m ² /hour
Heat exchange surface	109,3 m ² /m ³
Maximum operation temperatures	from -50 to +60 °C
Weight of cooling fill	19,98 kg/m ³
Connecting of fills to blocks	connecting elements or welding
Material of connecting elements	HDPE
Block size (13pcs of fills)	2400(1200) x 500 x 400 mm
Packaging – pallet 2400x1000 mm	2500pcs of fills
