

Impact spraying nozzle RT 240

Impact type spraying nozzle is intended for high-quality and equal water spraying over the whole area of cooling filling in counter-flow natural and induced draught.

Type RT 240	
Material	PP
Parts of the impact spraying nozzle	nozzle frame, body, pan, adjusting and saddle nut
Total weight	0,26 kg
Maximum water heat load	80°C
Diameter of the nozzle (in out flow)	22, 25, 28, 30 mm (as required)
Radius of saddle nut (pipeline Æ)	100, 150, 200 mm
System of mounting to the water pipe	sponge washer, 4 screws
Type	standard, extended lenght
Packaging	cardboard, PE bags, big-bag / according to PO QTY
